EDUCATION
Bachelor of Science in Information Technology.
Kibabii University, Bungoma Kenya

PROFESSIONAL AFFILIATION
iRob-Tech, CEO- Handa Robinsson.: https://irobtechnologies.com/

EXPERIENCE:

Mobile Application Developer
I develop Android applications using Flutter framework. I once developed a social media like application, where users were even able to chat, I used Flutter as the front end and Firebase as the back end, this is the my best project I have ever worked on. I can also create APIs for back-end services using Flask framework and Mongodb integration.

Data Analyst
I am aware of data analysis software like Excel, SPSS and Tableau. In addition of using these software, I am also able to use python Machine Learning packages such us pandas to help in performing analysis. All these software helped me perform analysis on a wide range of dataset, I was able to perform linear regressions to help in predicting the y value.
